## **DINOSAUR CLAY FUN**

Roll each leg to look like a party sausage.

Each leg should stand on it's own without support.

Squeeze the ends of the body and roll in your hands to create a banana shape.

Pick an end of the clay banana as the tail and one as the head. Make the tail more pointy and round the end of the head.

5

Use a serrated dinner knife to make a mouth. This will give a tooth effect.

Stick the body down onto the standing legs. Then turn upside down to smooth the leg and body clay into each other to join.

7 Use netting from fruit, lay it on to the dinosaur.
Stroke your dinosaur gently until the material starts to disappear. Do this all over. Other textures you could try are orange peel or melon peel. Once the texture is complete add eyeballs.

8 EXTENSION

You now have a basic dinosaur.

Is it wearing a hat and scarf?

Holding an ice cream in it's tail?

Carrying a baby dinosaur on it's back?

Use your accessories clay to personalise your dinosaur.

9 Is your dinosaur hungry?

Push some clay into the back of a leaf, then peel off the leaf.
